ML2021Spring HW4 Report

資工三 陳柏衡 b07902114

Public Score (Accuracy)	Private Score (Accuracy)
0.97095	0.97000

- The methods I used to pass the strong baselines include:
    - replace transformer with conformer
    - replace mean pooling with self attentive pooling
    - train 240000 steps
    - train two model and ensemble
